Abhijeet Raj

Computer Science and Engineering Student | Haridwar, Uttarakhand
abhi100602@gmail.com | +91-7324807790 | GitHub: abhijeetraj01 | LinkedIn: abhijeetraj07 | Portfolio

Professional Summary

Software Engineer skilled in full-stack development using JavaScript, React.js, and Node.js, with expertise in SQL, data analysis using Python, Pandas, and NumPy, and AI-assisted development and UI prototyping using Google Stitch. Skilled in leveraging AI to accelerate development while applying critical thinking and professional judgment to review, refine, and validate outputs for accuracy, quality, and reliability. Strong foundation in Data Structures and Algorithms, problem-solving, and software development fundamentals, with additional skills in graphic design using Adobe tools for posters, digital graphics, and visual assets.

Education

Degree	Institution	Year	Marks/CGPA
B.Tech CSE	Gurukula Kangri University, Haridwar	2023–2027	8.95 CGPA (6th Sem)
Sr.Secondary (XII)	Primus Public School, Muzaffarpur, Bihar	2021	92.4%
Secondary (X)	Primus Public School, Muzaffarpur, Bihar	2019	91.8%

Technical Skills

Languages	C++, Python, JavaScript, SQL
Backend	Node.js, Express.js, REST APIs
Frontend	React.js, HTML, CSS, Tailwind CSS
Database	MySQL
Data Analysis & Visualization	Pandas, NumPy, Matplotlib, Power BI, MS Excel
Tools	Git, GitHub, Docker, Adobe
CS Fundamentals	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

DSA Library GitHub | npm

- Developed a reusable **TypeScript** library implementing 10+ data structures, including Stack, Queue, Linked List, Hash Table, AVL Tree, Trie, Heap, Graph, and Union-Find.
- Implemented **20+ algorithms** covering sorting, searching, graph traversal and optimization (Dijkstra, Prim's, Kruskal's), and mathematical operations.
- Published the library to the **npm registry**, enabling developers to install and reuse its implementations through standard package management and module exports.
- Configured GitHub Actions CI, TypeScript build tooling, API exports, documentation, examples, and an MIT License to support automated build verification and open-source distribution.

DevScribe – A Full Stack Blog Platform Team project

- Built a full-stack web application using **Next.js** and React.js for a responsive, accessible user interface and Node.js/Express.js for backend REST APIs.
- Designed and queried a relational database using **PostgreSQL** to manage application data, ensuring data integrity and efficient data retrieval.
- Containerized the application using **Docker** and Docker Compose and implemented **CI/CD workflows** to automate application build and deployment.
- Implemented secure authentication and authorization using **JWT** and **bcrypt** password hashing.

Facial-Recognition Attendance System GitHub
React, Node.js, Express.js, Django, Python, PostgreSQL

- Developed a full-stack attendance platform using facial recognition and GPS-based geo-fencing to automate and validate attendance.
- Built REST APIs and integrated React.js, Node.js/Express.js, and Django services for attendance processing, user management, and location validation.
- Designed PostgreSQL-backed data management for users and attendance records, with responsive interfaces for monitoring attendance.

Certifications

- NPTEL – The Joy of Computing using Python
  Score: 82% – Elite Certification
- **Udemy** – Software Architecture & Design of Modern Large Scale Systems
  Instructor: Michael Pogrebinsky – 8 hours (Apr 2026)
- **PW Skills** – Basics of Data Analytics
  Instructor: Tushar Jha (Apr 2026)

Achievements & Languages

160+ LeetCode Problems Solved | Design Head – College Entrepreneurship Cell | 2025
